## RABBIT RESISTANT PERENNIALS

Rabbits are cute in somebody else's garden, but in some neighbourhoods they can cause a huge problem for the gardener. Most little bunnies that are hopping around are not wild hares that have made their way into the urban life but in fact a pet that has gotten loose, or been turned loose. There is very little that the homeowner can do to stop their nibbling. Trapping is quite hard and once caught what do you do with the rabbit? Planting rabbit resistant plants means that you may be able to control the damage done in your garden.

Aconitum - Monkshood  
Alchemilla – Lady's Mantle  
Aquilegia – Columbine
